

Medication Review services

Confidence that your injured person's medications are appropriate and cost effective

Gain better control of an injured person's medication therapy and your expenditures with our Medication Review service. Optum can help you address clinical concerns of high-risk and high-cost medications through assessment, actionable recommendations and dedicated follow-up to improve health outcomes and lower costs.

Medication Review

Our Medication Review provides an individualized evaluation of an injured person's current medication therapy by an Optum Clinical Pharmacist. In the review, the pharmacist identifies medication-related concerns and develops an action plan for problem resolution. Intended for high-risk, actively managed cases not in the process of settling, the Medication Review helps ensure the injured person is on the right medication regimen for optimal long-term outcomes—so that dollars are not spent on unnecessary or inappropriate treatments.

Proven Results

Medication Review services have demonstrated a recommendation acceptance rate of up to 70% and a return on investment of up to 8:1.

Optimal candidates for Medication Review

We help identify who would benefit from Medication Review based on:

- Total medication spend
- Use of multiple medications for treatment of injury
- Overutilization of medications
- Medication therapy exceeding recognized treatment guidelines

Benefits of the Medication Review Service

- Superior clinical assessments – Our evaluations are performed by Clinical Pharmacists who identify issues and provide treatment recommendations to assist in issue resolution.
- Medical oversight and provider intervention – Our panel of board-certified providers will collaborate with the prescriber on a treatment plan to optimize injured person outcomes.
- Cost containment through rational medication management – Our Clinical Pharmacists confirm appropriateness of medication regimens to reduce costs and decrease health risks.
- Follow-up by Clinical Nurses – Our experienced team works with the prescriber to ensure implementation of agreed upon changes to the medication regimen, which drives successful outcomes on spend and utilization.
